

ABDALLAH ALHYARI

Mobile & Software Engineer — Flutter / Android

Email: alhyariabdallh@gmail.com | Phone: +962 78 703 2264

LinkedIn: [linkedin.com/in/abdallah-alhyari-95b915201](https://www.linkedin.com/in/abdallah-alhyari-95b915201)

Location: Amman, Jordan → relocating to Brno, Czech Republic (2027)

Work eligibility: Eligible to work in the Czech Republic without a work permit as a full-time student in an accredited Master's programme.

PROFESSIONAL SUMMARY

Mobile & software engineer with 5+ years building and optimizing production Flutter and native Android applications across healthcare, secure authentication, e-commerce, and enterprise domains. Strong in NFC integration, secure token/JWT lifecycle management, offline-first architecture, and clean, scalable app design (MVVM / MVC). Currently relocating to Brno to pursue a Master's in Open Informatics at Mendel University, and seeking mobile or software engineering roles in Brno's IT sector. Comfortable working in English within international teams.

TECHNICAL SKILLS

Languages & Frameworks: Dart, Flutter, Kotlin, Android (native), Object-Oriented Programming

Architecture & Patterns: MVVM, MVC, Clean Architecture, Offline-first design, Reusable component libraries

Mobile & Devices: NFC integration & smart-card reading, Background processing (WorkManager), UI animation

Backend & Data: RESTful APIs, JWT authentication & secure token storage, MySQL, SQL Server, Firebase

Cloud & Tooling: AWS CloudFront, Git & GitHub, Bitbucket, Firebase

Foundations: Algorithms & data structures, secure data sync, testing & optimization

PROFESSIONAL EXPERIENCE

Senior Mobile Engineer | NatHealth

11/2024 – Present

- Led NFC integration for secure smart-card authentication, designing and formalizing the NFCCardReader interface and supporting multiple card technologies.
- Built a token-lifecycle security framework — two-step JWT issuance, secure storage, and GUID-based device binding — to harden authentication.
- Established client-side error-handling protocols, including exponential-backoff retries and standardized failure-handling guidelines, to improve reliability.
- Implemented an offline-first submission policy using WorkManager for background sync, status polling, and token refresh, enabling critical operations without connectivity.

Flutter Developer | EskaDenia Software

12/2022 – 11/2024

- Rebuilt and restructured Flutter applications to improve performance and maintainability, introducing new features and a more modular architecture.
- Applied profiling and optimization techniques and led thorough testing to validate improvements before release.
- Collaborated with stakeholders to gather requirements and delivered features on schedule.

Mobile Developer | Solutions Now

11/2021 – 12/2022

- Established reusable Flutter design principles and template libraries that streamlined delivery of commissioned applications.
- Documented design patterns for reuse across iterative development cycles.
- Integrated RESTful web services and designed data structures for dynamic datasets.

Mobile Developer | Future Advanced for Internet Solutions

07/2021 – 11/2021

- Coordinated backend-frontend integration for an M-Commerce application and a fitness & media-streaming app.
- Diagnosed and resolved issues through data analysis, improving operations and customer satisfaction.

DOMAIN EXPERIENCE

Healthcare (NFC smart cards, patient records, medical-services apps) • Government & Smart-ID (secure NFC authentication) • E-Commerce (m-commerce, product browsing & checkout) • Enterprise (ERP modules, secure data sync, offline-first apps) • Education / E-Learning (virtual lab simulation) • Fitness & Well-being (fitness & media-streaming apps).

EDUCATION

M.Sc. in Open Informatics | [Mendel University in Brno](#)

Brno, Czech Republic — from 2027

Admitted to the Faculty of Business and Economics; commencing studies in Brno.

B.Sc. in Software Engineering | [Al-Hussein Bin Talal University](#)

Jordan — 2018 – 2021

CERTIFICATIONS

- Flutter Development — Udemy
- Android App Development — Udemy
- Concurrent Programming with Android: Threads, Workers & Kotlin Coroutines — LinkedIn Learning
- Android App Development — One Million Arab Coders
- Multinational Communication in the Workplace — LinkedIn Learning
