

ABDALLAH ALHYARI

Mobile & Software Engineer | Flutter, Android, NFC

Amman, Jordan (relocating to Brno, Czech Republic in February 2027)

Email: alhyariabdallh@gmail.com | Phone: +962 78 703 2264

LinkedIn: [linkedin.com/in/abdallah-alhyari-95b915201](https://www.linkedin.com/in/abdallah-alhyari-95b915201) | Portfolio: alhyari.web.app/#home

Work eligibility: Eligible to work in the Czech Republic without a separate work permit as a full-time student in an accredited Master's programme.

Availability: Remote / part-time immediately; on-site in Brno from February 2027.

PROFESSIONAL SUMMARY

Mobile and software engineer with 5+ years shipping production Flutter and native Android applications across 4 companies and 6+ products in healthcare, secure authentication, e-commerce, and enterprise domains. Deep experience in NFC integration, secure token / JWT lifecycle management, offline-first architecture, and clean, scalable app design (MVVM, Clean Architecture). Relocating to Brno for a Master's in Open Informatics at Mendel University and seeking mobile or software engineering roles in Brno's tech sector. Comfortable working in English within international teams.

TECHNICAL SKILLS

- **Languages & Frameworks:** Dart, Flutter, Kotlin, Android (native), iOS, Swift (basics), Object-Oriented Programming
- **Architecture & Patterns:** MVVM, MVC, Clean Architecture, Offline-first design, Reusable component libraries
- **Mobile & Devices:** NFC integration, Smart-card reading, Background processing (WorkManager), UI animation
- **Backend & Data:** RESTful APIs, JWT authentication, Secure token storage, MySQL, SQL Server, Firebase
- **Cloud & Tooling:** AWS CloudFront, Git, GitHub, Bitbucket, Firebase
- **Foundations:** Algorithms & data structures, Secure data sync, Testing & optimization

PROFESSIONAL EXPERIENCE

Senior Mobile Engineer | NatHealth

Amman, Jordan | [LinkedIn](#) | Nov 2024 - Present

- Led NFC integration for secure smart-card authentication on the platform's healthcare authentication flow (NatHealth serves 400,000+ beneficiaries across Jordan, Palestine, and Iraq).
- Designed and formalized the NFC Card Reader interface, supporting multiple card technologies used across production.
- Built a token-lifecycle security framework—two-step JWT issuance, secure storage, and GUID-based device binding—hardening authentication for sensitive patient data.
- Established client-side error-handling protocols with exponential-backoff retries and standardized failure-handling guidelines, improving reliability of critical API calls.
- Implemented offline-first submission using WorkManager for background sync, status polling, and token refresh, enabling critical medical operations without connectivity.

Flutter Developer | EskaDenia Software

Amman, Jordan | [LinkedIn](#) | Dec 2022 - Nov 2024

- Rebuilt and restructured Flutter applications for a CMMI-5 certified software house with customers in 25+ countries across telecom, insurance, healthcare, and education.
- Introduced modular architecture and reusable components, improving performance and maintainability across multiple client projects.
- Applied profiling and optimization techniques to reduce screen-load and startup latency in production apps.

- Led thorough testing cycles to validate improvements before release, cutting post-release defects on rebuilt modules.
- Collaborated with stakeholders to gather requirements and delivered features on schedule.

Mobile Developer | Solutions Now

Amman, Jordan | [LinkedIn](#) | Nov 2021 - Dec 2022

- Established reusable Flutter design principles and template libraries that streamlined delivery of commissioned applications.
- Documented design patterns for reuse across iterative development cycles.
- Integrated RESTful web services and designed data structures for dynamic datasets.

Mobile Developer | Future Advanced for Internet Solutions

Amman, Jordan | [LinkedIn](#) | Jul 2021 - Nov 2021

- Coordinated backend-frontend integration for an M-Commerce application and a fitness & media-streaming app.
- Diagnosed and resolved production issues through data analysis, improving operations and customer satisfaction.

DOMAIN EXPERIENCE

Healthcare (NFC smart cards, patient records, medical-services apps); Government & Smart-ID (secure NFC authentication); E-Commerce (m-commerce, product browsing & checkout); Enterprise (ERP modules, secure data sync, offline-first apps); Education / E-Learning (virtual lab simulation); Fitness & Well-being (fitness & media-streaming apps).

EDUCATION

- **M.Sc. in Open Informatics** - Mendel University in Brno, Czech Republic
Faculty of Business and Economics - admitted, commencing studies February 2027.
- **B.Sc. in Software Engineering** - Al-Hussein Bin Talal University, Jordan (2018 - 2021)

CERTIFICATIONS

- Flutter Development - Udemy
- Android App Development - Udemy
- Concurrent Programming with Android: Threads, Workers & Kotlin Coroutines - LinkedIn Learning
- Android App Development - One Million Arab Coders
- Multinational Communication in the Workplace - LinkedIn Learning
